Do you know about rip rap? Ask the people from Pioneer Sand

Pioneer originated in Colorado over 40 years ago and expanded to Arizona in 1984. During that time, Pioneer has become the largest landscape materials supplier in the state. They have been involved in some of the largest, most ambitious projects in the state from highway projects to golf courses, providing quality products at competitive prices and professional customer service. In Arizona, Pioneer Sand has a fleet of 100 trucks with a central dispatcher to insure customers' needs are met. Besides the corporate office, Pioneer has 13 valley locations. Their service representatives can help you calculate the coverage of various materials from mulch, compost, soil mixes, sand, various gravels and arena sand, etc. Pioneer will be happy to supply your needs...everything from sand boxes to landscapes and driveways.

They also have several quarries which they own and operate themselves. Each of these produces an unrivaled color selection of rock, gravel and sand. Golden and chocolate browns, vibrant golds, vivid reds, Pioneer carries nearly every color imaginable. Pioneer has the largest selection of boulders too, ranging in size from 1' x 1' to 5' x 5'. And, there's also the Pioneer Block and Paver Plant, producing block and wall materials and pavers for any project. They manufacture their own line of block and pavers in five colors. An Arizona company with products manufactured right here in Arizona, supplying the contractor or the do-it-yourselfer. Their staff of experts are ready to help you. Feel free to bring in your ideas and plans to Pioneer and they will likely have same-day or next-day delivery to get your projects started.

The Pioneer Sand Company's reputation cannot be surpassed. Did you know they provided the materials for the University of Phoenix Stadium, home of the Arizona Cardinals? They also built and maintain ball fields in Surprise and Scottsdale due to the high level of their quality materials. "Pioneer Sand and their salesman, Kevin,

provided us with the best product, at the best price, for our reining arena. The service was fast and our footing is superior. Our horses love it and it is easy to maintain and dust free." - Brent Naylor. "Pioneer Sand provided the ultimate in customer service. It was one of the most professional, stress-free experiences I've ever had. Kevin helped me determine my needs from sand to top soil. I actually got same-day delivery over a holiday weekend." Lenore K.

And, they carry artificial turf, landscape cloth, grass and weed killer, too. That's because changing from grass to granite saves water. Water conservation is the biggest challenge we face today in the desert. In order to meet this challenge, several Arizona cities and towns provide rebate and assistance programs to reduce wasted water on plants and lawns. By providing funds for xeriscaping (landscaping designed specifically for areas with drought or where water conservation is practiced), artificial turf and drought tolerant plants, these municipalities help to sustain our water supply. Some of the cities involved in this project are: Avondale, Buckeye, Chandler, Flagstaff, Glendale, Mesa, Peoria, Scottsdale and Tempe. If your city is not listed, try calling their water conservation district or write your representatives to make a change.

So, where does rip rap fit into this? Well, rip rap is not a new kind of music. It is a type of erosion control used in dry washes and along shorelines. It also beautifies the dry stream bed by calling attention to the area. You may find it on the golf course, landscape or at your neighborhood bank. It is normally larger than gravel, anywhere from 2" to 16" in a multitude of colors.

So rip rap or rock, tumbled or non-tumbled pavers, (and don't forget the arena sand), turn to Pioneer for all your needs. They can be reached at 480-926-8200 or 602-999-1155.

EQUINE COLIC RELIEF STOPS COLIC!

Equine Colic Relief/EGR is an all-natural colic remedy that works to resolve a bout of colic that is in progress in as little as 90-200 minutes.

EGR is completely drug free, is 100% natural, contains no banned herbs or substances, is thoroughly tested and is completely safe for all equines, with a 13-year shelf life.

You are your horse's number one advocate. Your horse depends on you to make the right decisions. Have that first defense for colic ready when you need it.

What a perfect Christmas Gift for a horse person!
